

The University of Iowa History of Medicine Society
invites you to hear:

Harold Adams

Professor, Department of Neurology
University of Iowa College of Medicine

How Stroke Changed the Course of History in the 20th Century

Thursday, September 26, 2019

5:30-6:30

MERF Rm 2117

(Medical Education & Research Facility)

Stroke is a life-changing disease for anyone but when it strikes a political leader, the effects are even more profound. During the 20th century, stroke affected important world leaders that either caused their premature death or gave them major impairments in cognition that changed the course of history. The impact of stroke on men such as Lenin, Wilson, Roosevelt, Churchill and Stalin continues to be felt to this day.
