Copyright Addendum Instructions

The addendum is intended as a convenient way to seek the kinds of rights most academic authors would value. Here is how you might use it:

1. Sign your publisher's copyright transfer or publication agreement when you submit your final manuscript for publication with the following statement written above your signature: "subject to attached amendment"
2. Attach this amendment with the information filled in and your signature at the bottom.
3. Send both to publisher and save a copy for your records.

The publisher may accept the amendment, reject it outright, or offer a different (more generous) version of the original agreement. You can at that point sign the original or modified version of the agreement, continue negotiations, or seek an alternative outlet for your article.

If at any point you would like to consult someone about options, or if you or your publisher have questions or concerns, contact: Carmelita Pickett (carmelita-pickett@uiowa.edu, 319-335-5867) Associate University Librarian.

CIC's STATEMENT ON PUBLISHING AGREEMENTS

The Committee on Institutional Cooperation (CIC)^[1] is a consortium of 13 world-class American research universities, advancing their missions by sharing expertise, leveraging campus resources and collaborating on innovative programs. For 50 years, the CIC has created new opportunities for member universities to work together toward greater efficiency, effectiveness and impact.

*[For a fuller consideration of the issues addressed herein, see:
"Copyrights and the Paradox of Scholarly Publishing"
by R. Michael Tanner, Provost, University of Illinois at Chicago,

Publication is the lifeblood of a research university. It is incumbent upon faculty, campus administrators and librarians to ensure the free flow of scholarly information in fulfillment of our campus missions to advance the public good through research and education. Toward this end, our campuses are committed to supporting a sustainable publication process and a healthy publishing industry. The "information revolution" has greatly expanded the means for disseminating and utilizing scholarly discourse, but this opportunity for extending the reach and impact of our campuses is countered by social and economic conventions of some sectors of the publishing industry. Suitable publishing partners for academic enterprises should be encouraging the widest possible dissemination of the academy's work, and the management of copyright should be directed to encouraging scholarly output rather than unnecessarily fettering its access and use. Without some important changes in publishing practices, authors and readers will continue to be frustrated by barriers to the free flow of information that is an essential characteristic of great research universities.

Faculty authors should consider a number of factors when choosing and interacting with publishers for their works. The goal of publication should be to encourage widespread dissemination and impact; the means for accomplishing this will necessarily depend on the nature of the work in question, the author's circumstances, available suitable outlets, and expectations in the author's field of inquiry. In general, authors are encouraged to consider publishing strategies that will optimize short- and long-term access to their work, taking into account such factors as affordability, efficient means for distribution, a secure third-party archiving strategy, and flexible management of rights.

Protecting intellectual property rights is a particularly important consideration, as many authors unwittingly sign away all control over their creative output. Toward this end, the CIC encourages contract language that ensures that academic authors retain certain rights that facilitate archiving, instructional use, and sharing with colleagues to advance discourse and discovery. Accompanying this document is a model CIC publishing addendum that affirms the rights of authors to share their work in a variety of circumstances, including posting versions of the work in institutional or disciplinary repositories. While the particular circumstances and terms governing publication will vary on a case-by-case basis, the underlying principle of encouraging access to the creative output of our campuses should inhere in all of our efforts.
